

APPLIED TRAINING COURSE @ IHMH (www.imh.in)

– How is it done? How will you learn? How will you get certified?

- ❖ Practical, Interactive, Pragmatic, and Practitioner-Focused Learning
- ❖ Pragmatic and Scenario-Based Assignments with Interactive Sessions
- ❖ Duration of the Course - 06 months / Maximum duration 2 years
- ❖ 06 Modules per course – one module per month – 12 credits – 2 credits/module

❖ In short

- ✚ In-Depth and Essential Expertise
- ✚ Each module includes a comprehensive set of learning materials such as eBooks, presentations, charts, videos, audio files, case studies, vignettes, assessment forms, report templates, & quick study guides, tailored to the needs of each module.
- ✚ Modules feature an orientation session (if selected), a structured learning program, assignments to complete, and a feedback process for submitted work.
- ✚ Each module provides broad knowledge on the topic and trains learners in relevant techniques and tools specific to the module's focus.
- ✚ Course content is practical and work-focused, enabling learners to immediately apply what they learn to their practice from day one.

❖ Learning Modality

- ✚ Highly Interactive with Options for Fixed or Flexible Course Schedules (for Email-Based Learning)
- ✚ One interactive session per module for discussion & learning (available for those selecting the interactive course option)
- ✚ Self-paced learning through provided materials with guidance from an expert
- ✚ Expert guides specialized in the specific course area

❖ Mode

- ✚ Virtual Learning with Options for Email-Based Discussions or Real-Time Interactive Voice Sessions
- ✚ Course delivery via email, with 24/7 Student Advisor support available through WhatsApp or call
- ✚ Guide assistance provided through email or real-time interaction

❖ Materials

- ✚ Comprehensive Learning Materials: eBooks, presentations, charts, videos, audio files, quick reference guides, tip sheets, assessment forms, and other essential documents.
- ✚ In-Depth Coverage: Includes necessary knowledge for therapy practices, documentation, assessment, reporting, case studies, modern tools, techniques, and vignettes, tailored to module requirements.

❖ Learning Assessment at IHMH

- ✚ Our assignments will emphasize Realism by providing realistic tasks and contexts, cognitive challenges, and evaluative judgment. This approach helps students develop critical thinking and quality-assessment skills. As part of this, students will be encouraged to build portfolios throughout their unit of study or project-based learning experience. These portfolios should include journal entries, initial drafts, reflections, prototypes, and other evidence of learning, ensuring that assessments are dynamic and accurately reflect students' progress.
- ✚ Documenting what they do, how they do it, and why is essential for assessing their learning process. Portfolios will showcase a variety of work, such as essays, problem sets, presentations, and other assignments, along with reflections on each piece. This offers a comprehensive view of students' learning and growth.
- ✚ While oral exams will still be used when appropriate, they will be more interactive. Instead of simply answering questions, students will have opportunities to present, debate, or engage in discussions, enhancing the assessment experience and showcasing their skills in a more dynamic and reflective manner.

❖ Modality

- ✚ Upon registration, you will receive the course schedule and guide details.
- ✚ Course module materials will be delivered according to the dates outlined in the schedule, allowing you to begin learning.
- ✚ For those in virtual mode, each module will begin with a virtual orientation session. Others will receive an orientation email to get started.
- ✚ After the initial training session, you will continue learning through the provided materials. If you encounter difficulties or need further clarification, you can reach out to the guide via email for assistance.
- ✚ Assignment questions will be provided with the module materials. You are required to answer these questions and email your responses back to the guide.
 - Assignment questions will be pragmatic, requiring learners to apply the concepts from the module to provide responses.
 - Responses can be submitted in various formats: typed text, charts, PowerPoint presentations, written answers, or audio recordings. The responses should be concise and directly address the question, even if only a few lines.
 - Case studies will be provided in relevant modules, and learners will need to apply the techniques, strategies, or knowledge learned to solve them. The guide or trainer will provide the required format and assist learners in applying the appropriate techniques to analyse and solve the cases.
- ✚ After assignments are submitted, the guide will review them, provide feedback, make corrections if necessary, and appreciate the learner's good work.
- ✚ All modules will follow this process, and the learner will submit the final collection of completed assignments for review by the external guide.
- ✚ Learners will receive certification based on their completed assignments; there will be no separate final exam for certification.
- ✚ Once the final submission is made, the assignments will be assessed by two qualified guides/trainers, and certification will be granted upon meeting the course requirements.
